

When people see alien beings, what do they see?

There are many people who claim they have seen beings from “outer space”. Others claim that they do not exist at all.

1. What does the bible say about where these being come from?
Isaiah **45:18-19** Genesis **1:16, 14**
Romans **8:22**

God told us that the earth was created to be inhabited. In contrast, the bible tells us very simply that “God made the stars also”. The stars and other “planets” were created by God for the purpose of telling time. Since the bible tells us that the earth and the earth alone (implied) was created to be inhabited, we can assume that all of the other planets throughout the universe are uninhabited.

2. If there are such alien beings what do we know about their state of salvation?
Romans **8:1-3, 22**; 5:12-14

The scriptures tell us that all of creation was and is affected by the sin of Adam. This means that all beings of all sort are not saved but are corrupt and would be in need of salvation. If there were such beings, they would not be a descendent of Adam. Since Jesus Christ is a descendent of Adam and came in the “likeness of sinful flesh”, He is capable of redeeming ONLY those who are of descendants of Adam. This means that any other created being is incapable of being saved.

Although the scriptures do not specifically state that there are NO alien beings from other planets because of the scriptural status of the earth and the rest of the universe, we can be fairly confident that beings from other planets most likely do not exist.

3. If these people did not see alien beings, what did they see?
 Proverbs **3:5-6** Deuteronomy **29:29**
 2 Corinthians **11:14-15**

In reality, we have no idea what these people actually did see, but God knows. God has not chosen to reveal to us what these people did see. What we do know is that we need to be careful about the interpretations we make concerning what we believe we have seen and heard. Our senses can be “tricked” and misinterpreted. We do know that the vast majority of alien space craft sightings can easily be explained by natural phenomenon and man made objects. It is also known that a vast majority of pictures of alien craft and of even the video of an alien “autopsy” were fabricated by man.

Although it is possible that such alien being sighting could be sightings of “demons”, since even Satan has been “transformed into an angel of light”, this is most likely not the case but it could be possible.

4. What are the ramifications of their actually being such alien beings?
Jeremiah **17:9**

We know that the “heart is deceitful” and “desperately wicked”. This means that every heart in the universe is wicked and selfish. Such alien beings would be following after their wicked heart, which cannot be redeemed. Most likely they would encounter the people of the earth in order to enslave and destroy them.
